Faculty of Informatics, Artificial Intelligence and
Control Systems

Department of Automatic Information Processing
and Control Systems

ADDITIONAL EDUCATION

« Beginner React- developer» , KTS Metaclass, 2022

« Frontend Start» , Itlogia, 2022

RELEVANT EXPERIENCE

Developing [E-commerce project](#) (React, Typescript, MobX, Webpack) during my studies at Metaclass allowed me to get experience quite close to commercial development since project architecture and deadlines for all of the features were negotiated and my code was weekly reviewed. I also worked with API, stylized my project with SCSS and got familiar with MobX state manager.

Developing [ColorPalette](#), [CarRent](#) and [Personal Portfolio](#) helped me to strengthen my layout and VanillaJS skills, and got me familiar with semantic tags. Developing [Hoobank](#) project helped me to get familiar with creating adaptive layout in React applications, and also introduced me to css-framework Tailwind
